ABOUT ME

First-class Business Administration graduate with a strong analytical background and proven academic excellence. Transitioned into technology through a six-month full-stack web development program, gaining hands on experience in building and deploying responsive web applications using JavaScript, React, Node.js and PostgreSQL. Passionate about software development, problem solving and continuous learning with a keen interest in contributing to innovative projects as an entry level developer

EXPERIENCE

Full stack Developer
Freelance / Contract   *April 2025 - September 2025*

- Built a full-stack movie rental application using React, Node.js, Express and PostgreSQL
- Implemented user authentication, profile management, wish list, and rentals functionality
- Developed an admin panel to manage movies and users (CRUD Operations)
- Deployed frontend on Vercel, backend on Render and PostgreSQL database on Neon

Full stack Developer
Freelance / contract   *September 2024 - March 2025*

- Developed a grocery delivery platform with separate seller and customer dashboard
- Implemented customer features including profile management, wish list, order history, and address management
- Integrated seller functionality for product management and order tracking
- Used React, Node.js, Express, MongoDB, and Axios for API communication

Full stack Developer
Freelance / contract   *January 2024 - July 2024*

- Built a full-stack flight booking platform with React, Node.js, TailwindCSS, MongoDB and Supabase, featuring real time updates and cloud deployment (Vercel and Render)
- Implemented user authentication, wallet system, booking history, and flight alerts using Clerk and integrated secure payment tracking
- Developed partner agent dashboards for resellers and an admin panel for managing users, operations, and analytics
